## Education

2013–2017 **Bachelor of Science, Informatics**, *University of California, Irvine*.  
Cumulative GPA: 3.4

## Professional Experience

January 2016–Present **Development Intern**, *Rohm*, Irvine.

- Implemented additional APIs for an iOS platform dealing with event coordination and event discovery
- Overhauled existing modules to fix programming bugs created from outsourced code
- Constructed documentation detailing a high-level overview of the code structure for later implementation in the Android version

## Software Projects

February 2016 **Procrastination**, *TreeHacks*, Stanford.

- Collaborated with a multi-disciplinary team to create a Google Chrome extension that keeps track of active tabs pages of browser activity and visually displays that information using the highcharts framework
- Led the application design process to mind-map the most important features
- Designed the front-end features by writing scripts in HTML/CSS using the Bootstrap 3 framework

November 2015 **Unavoidable**, *HackUCI*, UCI.

- Developed a first-person survival horror game for the Oculus Rift Development Kit 2
- Designed the map layout, menu scene, and gameplay in which the player must escape a labyrinth while being chased by an enemy AI
- Learned the basics of the Unity3D 5 Engine and C# behavior scripts to apply them all within a 24 hour timeframe

March 2015 **Connect Four**, *Othello*, UCI.

- Implemented a console-based implementation of Connect Four and Othello using Python
- Learned introductory socket and protocol concepts and used them to play Connect Four with a server AI
- Learned to build a graphical user interface for the Othello game logic using tkinter

## Leadership and Community

June 2013 **Eagle Scout Project**, *Boy Scouts of America*, Westminster.

- Developed and led a project involving the creation of wooden storage shelves for children at a local elementary school
- Managed a group of 15 people and assigned them different tasks such as painting and nailing

## Skills

- Proficiency in object-oriented programming with Python and Swift
- Practical knowledge of HTML, CSS, Xcode, Cocoa, git
- Basic knowledge of C# and Unity, Linux/UNIX, Javascript, Java
