_____

Education

2013- 2017
University of California, Irvine
Bachelor of Science, Informatics
Organizations and Information Technology
Human Computer Interaction
Major GPA: 3.7

Experience

June 2016 – September 2016
Metronome Software, LLC
UX | UI Design & Development

- Assisted in the development of client server software for the Air Force Research Laboratory
- Involved in the software development process from hand drawn wireframes to Sketch mockups to implementation
- Designed low and high fidelity mockups for Server and Mobile User Interface
- Worked in a team environment of 10 developers
- Attended weekly meetings, code reviews and participated in quality assurance testing
- Presented mockups, user flows, and other designs to President and Software Lead
- Exposed to SCRUM Agile development using software management tools such as Jira and Confluence to complete assigned tickets for a given sprint
- Committed and pushed code using Mercurial version control and merged using diff clients such as Meld and vimdiff
- Self taught and learned existing code base

April 2016 - June 2016
MacinCloud, Moboware Inc.
Digital Marketing

- Engaged social media frontier by utilizing various tools such as Google Analytics, Twitter Analytics, Hootsuite, Manage Flitter and Facebook Ads to promote business
- Designed landing pages, photo advertisements, checkout and help desk portals using HTML, CSS, JavaScript, WIX, Photoshop, and Illustrator
- Strategized, designed and deployed marketing campaigns centered around Developer Conferences, tech news, and software updates

Projects

August 2016
NIDUS | Secure Hypervisor for Nested Virtualization Layers

- Initiated branding effort for NIDUS including official logo and color scheme
- Created Sketch mockups, user flows, and modified requirements documentation
- Finalized UX/UI design decisions backed by usability heuristics and client centered research

June 2016
eCloak | Enterprise Cloud Access Lock

- Researched and assessed Google Material Design and appropriated eCloak UI to the proper design standard
- Created Sketch mockups, user flows, and modified requirements documentation
- Designed and implemented bootstrap modals and icons sprite sheets for Web and Mobile GUI

July 2016
mažutė | Online Clothing and Shoes Boutique

- Created Sketch mockups, user flows, and requirements documentation
- Researched appropriate business strategies, technical feasibility, and formulated business plan

Awards

- NASA SpaceApps Hackathon – Most Inspiring Award| FlagtTraveler | Judged by NASA CTO Deborah Diaz
- Dean's Honor List
- Institute of International Education STEM Scholarship | University of Manchester, UK

Skills
